PR No 1. Total Bilangan Genap Ganjil

```cpp
# include <iostream>
using namespace std;
int main ()
{
  int bil, total_genap, total_ganjil, i;
  total_genap = 0;
  total_ganjil = 0;
  i = 1;
  while (i <= 5)
  {
    cout << "Bilangan ke-" << i << ": ";
    cin >> bil;
    if (bil % 2 == 0)
    {
      total_genap = total_genap + bil;
    }
    else
    {
      total_ganjil = total_ganjil + bil;
    }
    i = i + 1;
  }
  cout << "Total Penjumlahan Bilangan Genap = " << total_genap << endl;
  cout << "Total Penjumlahan Bilangan Ganjil = " << total_ganjil;
  return 0;
}
```

```cpp
#include <iostream>
using namespace std;

int main(){

    int bil, total_genap, total_ganjil, i;
    total_genap = 0;
    total_ganjil = 0;
    i = 1;

    while (i <= 5)
    {
        cout << "Bilangan ke-" << i << ": " ;
        cin >> bil;
        if (bil % 2 == 0)
        {
            total_genap = total_genap + bil;
        }
        else
        {
            total_ganjil = total_ganjil + bil;
        }
        i = i + 1;
    }

    cout << "Total Penjumlahan Bilangan Genap  = " << total_genap <<endl ;
    cout << "Total Penjumlahan Bilangan Ganjil = " << total_ganjil ;

    return 0;
}
```
